

ECSE 539 / COMP 533 Assignment 1

Patrick Diez (260276972), Edward Newell (123456789), Ran Gao (260501253)

September 26, 2014

1 Task Breakdown

This section should have one paragraph that describes which team member is responsible for which individual parts of the URN model and who contributed to the parts that are a team effort. Ran Gao is responsible for goal model for customer and scenario model for withdraw plug-in in the root map.

2 System Description

This section should have two paragraphs containing a description of the chosen system. The system we choose is the automated tellermachine (ATM). ATM is produced by a manufacture, deployed and managed by a bank and used by a customer. Using an ATM, customers can access their bank deposit or credit accounts in order to make various transactions including withdraw, deposit, transfer money.

3 Modeling Outcomes

This section should have four paragraphs discussing what went well and what did not go well when modeling the system, possibly with suggestions on how to improve the modeling experience.
